## Spreadsheet

Formula Generation in Excel:

Create a formula to [goal] in cell [range of cells]

- Create a formula to **calculate the sum** in cells **A1 to A10**
- Create a formula to **calculate the average** in cells **H10 to H20**
- Create a formula **that sums only the expenses that have the status "No" in column C**

Explain formula

Explain the meaning of the formula [formula]

- Explain the meaning of the formula **=SUM(A1:A10)**
- Explain the meaning of the formula **=AVERAGE(H10:H20)**
- Explain the meaning of the formula **=SUMIF(C1:C13,"No", B1:B13)**

Advanced Formulas, Macros and VBA

- I have a table with phone numbers in **column A** that have the format: (xxx) xxx-xxxx. Extract the numbers within parenthesis using Excel
- Create a macro that **calculates the average** of cells **B1 to B10** and **inserts the result in cell C1**
- Create a macro that sorts sheets by tab name using VBA.

Google Sheets

Create a formula to [goal] in cell [range of cells]

- Create a formula in Google Sheets to **calculate the sum** in cells **A1 to A10**
- Create a formula in Google Sheets **that puts data from one sheet into the current sheet**
- Explain this Google Sheet command: [insert command]

## Foreign Language

Ask questions:

What's the difference between [word1] and [word2] in [language]? Provide X examples

- What's the difference between **por** and **para** in **Spanish**? Provide 2 examples
- What's the difference between **tu** and **voce** in **Portuguese**? Provide 4 examples

Conversation:

Act as a language partner. You'll start a conversation with me about [topic] in [language]. In every response, you should provide your opinion and then ask me a question to keep the conversation going.

Write essays in any level:

Write a [level] [type of essay] in [language], about [topic]. It must be X words long.

- Write a **B1 report** in **English** about **pollution**. It must be 500 words long
- Write a **A2 letter** in **Spanish** about **your financial situation**. It must be 300 words long
- Write a **C1 review** in **Portuguese** about a **tech product**. It must be 500 words long.

Vocabulary:

Create a table of difficult words from the previous essay and translate them into [language]

Pronunciation:

Create a table with 2 columns: In the first column type the [language] words: [word1, word2, ...]. In the second column, you should provide the phonetic transcription.

## Content Creation

Ideas Generation:

Give me ideas for [type of content] about [subject], covering topics like [topic1, topic2, ...]

- Give me ideas for a **blog post** about **writing** covering topics like **writing tools** and **writer's block**.
- Give me ideas for a **podcast** about **technology** covering topics like **AI** and **machine learning**.
- Give me ideas for a **YouTube video** about **best books to read** covering only **self-help books**.

Outlines

Create an outline for [type of content]

- Create an outline for a **blog post** about **productivity**
- Create an outline for a **book** "how to learn to learn a foreign language in 3 months"
- Create an outline for a **course** "how to learn Python for data science"

Course Quiz:

Turn a [list] into [type of quiz]

- Turn a **list of facts** about **world history** into a **multiple-choice quiz**
- Turn a **list of facts** about **biology** into **true/false question**

Thumbnail:

Act as a prompt generator for Midjourney's AI. Your job is to describe [object] as concisely as possible. Always give 3 different and contrasting versions of a [object] and include any random artist name prefixed by "in the style of"

Giveaway:

Choose X random contest winner(s) from a long list of names or emails: [insert names or emails]

## Programming

### Coding Questions:

How to [action] in [programming language]?

- How to merge dictionaries in Python?
- How to join two datasets in Python?

What's the difference between [concept1] and [concept2] in [language]?

- What's the difference between lists and dictionaries in Python?
- What's the difference between OOP and functional programming?

Explain the [concept] in [language]

- Explain the while loop in Python
- Explain the try/except in Python to a child

### Advice:

I want to learn [language] for [field]. Create a roadmap to learn [language]

- I want to learn Python for data science. Create a roadmap to learn Python
- I want to learn JavaScript for web development. Create a roadmap to learn it

I want to automate [app]. Provide steps to [task] with [language]

- I want to automate Gmail. Provide steps to sending emails with Python
- I want to automate Tinder. Provide steps to swipe right with Python

Simulate a job interview for a [position] by asking and answering questions as if you are a potential employer and I'm the candidate. Consider that [details]

### Web Development:

I want to build a [type of website]. Can you generate some HTML for my website?

- I want to build a job board website. Can you generate some HTML for my website?
- I want to build a price comparison website. Can you generate some HTML for my website?

### Additional steps:

- Can you center the content in the HTML page, add a line break between the inputs and add an image on a logo?
- Add CSS to customize the size of the logo image

### Automation:

- Send the message "[type message]" on Whatsapp using Python and pywhatkit
- Send an email from [email\_1] to [email\_2] with the subject [email subject] and the content [email content] using Python
- Use Python to rename all the [file extension] files in my directory. Add the word [word] to each name

## Data Science

### Data Science Questions:

Where can I find data for my [describe project]?

- Where can I find data for my credit card fraud detection project?
- Where can I find data for my customer churn prediction project?

How to [action] my dataset?

- How to oversample/undersample my dataset?
- How to split my dataset into train and test sets with Python?

### Best practices:

Can you [best practice] my code?

- Can you optimize the following Python code?
- Can you simplify the following R code?
- Can you document my code?
- Can you check for readability in my code?

### Automate Data Science Tasks:

- Translate my Python code to R
- Turn this SQL code to Python pandas code
- Format my SQL code by converting the reserved keywords to uppercase
- Create a SQL query that [describe query]
- Write a regex in Python that [describe regex]

### Data Science Workflow:

Web scraping (only working for a few websites)

- Web scrape [website] using [language] and [library]

Generate data

- Act as a fake data generator. Create a dataset that has X rows and Y columns: [column1, column2, ...]

Train Classification model

- I have a dataset of [describe dataset], build a machine learning model that predicts [target variable]

Tune Hyperparameter

- I've trained a [model name]. Write code to tune the hyperparameters

Feature Importance

- I've trained a [model name]. Write code to find the most important features in the model
